

“Student” Voluntary Medical Insurance Program

1. Outpatient care.

- 1.1. Initial and repeated medical treatment provided by doctors of the following specialties: general practitioner, surgeon, ophthalmologist, gynecologist, otolaryngologist, traumatic/orthopaedic surgeon, cardiologist, neurologist, endocrinologist, dermatologist, gastroenterologist, urologist, physical therapist.
- 1.2. Execution and issuance of necessary medical documentation (medical sick leave certificates, extracts from outpatient medical records).
- 1.3. Laboratory diagnostics: biochemical and clinical tests of urine and blood.
- 1.4. Functional diagnostics: ECG (electrocardiogram), EEG (electroencephalogram), REG (rheoencephalography), EchoCG (echocardiography).
- 1.5. X-ray diagnostics: chest X-ray (photofluorography), chest X-ray examination during acute infectious diseases and bone X-ray in case of injuries; CT (computer tomography), MRI (magnetic resonance tomography) – in case of emergency medical concerns.
- 1.6. Ultrasonic scan of abdominal cavity, kidneys and pelvic organs.
- 1.7. Endoscopic examination: fibrogastroduodenoscopy.
- 1.8. General treatment procedures: physiotherapy (treatment by electricity, light, heat; magnetic or laser therapy) – up to 10 procedures per insurance period; classic massage therapy – up to 10 massage sessions per insurance period; therapeutic exercises (together with other patients) – up to 10 sessions per insurance period.
- 1.9. Initial and repeated at-home examinations by a general practitioner (at-home medical care is provided to those insured students who – for health reasons – can't visit a medical institution on their own).
- 1.10. Preventive medical examination (including prophylactic fluorography, HIV and RW tests) – 1 time per insurance policy period.

2. Emergency dental care.

- 2.1. Advice given by medical specialists: general care doctors, dental surgeons.
 - 2.2. Local anesthesia (of infiltration, application and nerve-blocking types).
 - 2.3. Filling teeth with chemical cure dental materials.
 - 2.4. Removing a tooth filling for medicinal purposes.
 - 2.5. Tooth veneer repair – provided the damaged part does not exceed 50% of the tooth (without dental posts).
 - 2.6. X-ray diagnostics.
 - 2.7. Tooth removal.
3. Hospital care (emergency hospitalization).
 - 3.1. *Emergency hospitalization (a bed in 2/3/4-bed wards is provided) by an ambulance (emergency first response) medical team in case of any life-threatening conditions.*
 - 3.2. Stay at an intensive care unit.
 - 3.3. Resuscitation procedures.
 - 3.4. Staying and getting meals at a hospital; receiving necessary medical procedures (of conservative and surgical character), doctor advice and other professional services; undergoing temporary disability examination; receiving services of junior medical personnel.
